

Quick Start Guide for EagleEye App

This document briefly describes how to install and manage the EagleEye app on your Android™ tablet.

Introduction to EagleEye app

InterferenceAdvisor™ EagleEye™ is Viavi Solutions' Android application that has been designed for interference hunting. It displays received signal level, frequency, and suspected interference area on Google Maps. Its easy-to-use features make interference hunting activities quick and easy.

Setting up your tablet

After you have turned up your tablet and completed the initial set-up, you need to set up the required settings for the EagleEye app.

To activate the developer mode

- 1 On the Home screen, go to **Apps > Settings > System > About device**.
- 2 Scroll to and tap **Build number** seven times.
The Developer options menu appears under **Settings > System > Developer options**.

To enable the allow mock location

- 1 Go to **Apps > Settings > Developer options**.
- 2 Scroll to **Allow mock locations**, and then check the checkbox to enable.
When enabled, a check mark appears in the tick box.

To connect to a Wi-Fi connection

- 1 On the Home screen, go to **Apps > Settings > Wi-Fi**.
- 2 Tap the switch to activate the Wi-Fi feature.
After searching nearby network, the tablet displays a list of networks.
- 3 Select a network from the networks list.
- 4 Tap **CONNECT**.

NOTE

To learn more about your tablet, please refer to "Galaxy Tab S2 User Manual".

Installing the application

The EagleEye app requires a registered Google account and Google Play services 9.0 or higher version.

To add a Google account

- 1 From a Home screen, go to **Apps > Settings > Accounts**.
- 2 Select **Add account > Google**.
- 3 Follow the on-screen instructions to complete the account setup.

NOTE

You can also set up your Google account or create a new Google account when you turn on your tablet for the first time or after performing the data reset.

To check the version of Google Play services

- 1 From the Home screen, go to **Apps > Play Store**.
- 2 Tap (☰) on the search field or drag the screen edge from left to right, and then select **Settings**.
- 3 Scroll to **Build version** and then check the current version of Google Play services. To download and install the latest version of Google Play services, touch **Build version**.

To download and install the EagleEye app

- 1 On your tablet, open the **Internet** app.
- 2 Go to <http://celladvisor.updatemyunit.net/>, and then download the apk file for the EagleEye app.
The downloaded file will be stored in your tablet's storage.
- 3 On the Home screen, go to **Apps > My Files > Download**.
- 4 Tap the **EagleEye.x.x.xx.apk** file and then tap **INSTALL**.
Once installed, the EagleEye app appears on the Apps screen.

NOTE

To learn about how to use the EagleEye app, please refer to the "EagleEye App Help" in the EagleEye app.
